Frontend Software Engineer focused on React and TypeScript applications, real-time interfaces, and production reliability. Experience spans financial services, transaction dashboards, and booking platforms.

SKILLS & TECHNOLOGIES

Languages & Frontend: React, TypeScript, JavaScript, Next.js, Redux, HTML, CSS
Web Engineering: REST APIs, WebSockets, server-side rendering (SSR), SEO
Development Tools: Vite, Git, Browser DevTools, Jira
Monitoring & Analysis: Splunk, Glassbox, production debugging, alert investigation

PROFESSIONAL EXPERIENCE

Wells Fargo | Software Engineer — Aug 2026 - Present

- Develop frontend features and UI updates for Wells Fargo web applications, combining hands-on development with analysis of client-side application behavior.
- Investigate React/Redux dispatch errors using browser diagnostics and Splunk logs; review code paths and recurring error patterns to support issue triage.
- Use Splunk and Glassbox to analyze production UI issues and alert patterns, documenting findings for application and platform engineering teams.
- Validate pull-request changes locally and across desktop and mobile views, recording screenshots and findings in Jira to support release readiness.

ATLABYTE | Software Engineer — Aug 2024 - Jun 2026

- Built React and Vite dashboards for cryptocurrency wallet monitoring and fraud investigation, presenting transaction activity and risk indicators in a single interface.
- Integrated WebSocket feeds to keep transaction and status views synchronized with incoming wallet activity.

Breez | Software Engineer — Oct 2023 - Jul 2024

- Developed React and Vite frontend features for cryptocurrency applications. Contributed to application structure, build workflows, coding standards, code reviews, and technical documentation.

Bookinglane | Software Engineer — Jan 2022 - Sep 2023

- Built React and Next.js booking and payment flows for B2B and B2C users with real-time updates.
- Developed live vehicle-tracking views with WebSockets and geolocation APIs for driver locations and ETA updates.
- Worked on server-side rendering and SEO for customer-facing Next.js pages.

TechVenture Solutions | Software Engineer — Nov 2018 - Dec 2021

- Built React dashboards with live charts, order books, portfolio views, and interactive analytics.
- Integrated REST APIs and real-time feeds across client web applications; contributed to feature development, testing, and code reviews.

EDUCATION

Western Governors University — In progress
Bachelor's degree in Computer Science

International University of Kyrgyzstan — 2020 - 2022
College program in Computer Science - Completed
